Collaborate with the University of Verona like auxiliary professor for the practice part of a course: Sport methodologies and technique of physical preparation (Football/Soccer).

## PUBLICATIONS

**Influence of pitch size and goalkeepers on external and internal load during small-sided games in amateur soccer players**

**2021** [https://lnkd.in/dZwT\\_as](https://lnkd.in/dZwT_as)

Roberto Modena - roberto.modena@univr.it

**Abstract**

**Purpose**

To analyse the influence of goalkeepers during 4-a-side small-sided games, played in pitches of two different sizes (small: 30 × 20 m, large: 40 × 30 m).

**Conclusion**

Implementing small-sided games, coaches should be aware that lower external load with similar internal load could be provided using small pitch with goalkeeper rather than either small goals or larger pitch. Furthermore, large small-sided games without goalkeeper may be the best choice for eliciting high training load.
